Office Action Summary

Art Unit: 3753

This action is responsive to the communication filed June 18, 2001.

Claims 10-14 and 17-21 are withdrawn from further consideration by the examiner, 37 C.F.R. § 1.142(b) as being drawn to a nonelected species. Election of Species E, Figure 6, was made without traverse in Paper No. 9.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --  
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-9 and 15-16 are rejected under 35 U.S.C. §102(b) as being anticipated by Gordon et al. In Gordon et al the contact area is defined by 17 and 18, and the sharp outer edge of 17 is read as a step. The sloping surface adjoining the edge is inherently a guide surface.

The Prior Art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show similar valve constructions.
